GENERAL SOIL MAP
RICHARDSON COUNTY, NEBRASKA

Scale 1:190,080

SOIL ASSOCIATIONS *

- 1** Haynie-Albaton association: Deep, nearly level, moderately well drained, silty soils and poorly drained, clayey soils on Missouri River bottom lands
- 2** Kennebec-Judson-Wabash association: Deep, nearly level to gently sloping, well-drained, silty soils and poorly drained, clayey soils on Nemaha River bottom lands and foot slopes
- 3** Monona association: Deep, very gently sloping to steep, well-drained, silty soils on uplands
- 4** Marshall-Sharpsburg association: Deep, nearly level to strongly sloping, well drained and moderately well drained, silty soils on uplands
- 5** Wymore association: Deep, nearly level to strongly sloping, moderately well drained soils that have a silty surface layer and a clayey subsoil; on uplands
- 6** Morrill-Pawnee-Mayberry association: Deep, gently sloping to moderately steep, well drained and moderately well drained, loamy soils that have a loamy or clayey subsoil; on uplands
- 7** Kipson-Benfield-Sogn association: Shallow, somewhat excessively drained, and moderately deep, well-drained, gently sloping to steep, silty soils over shale and limestone; on uplands

*Texture refers to surface layer of major soils in each association unless otherwise stated.
